Castleford College

AWARDING BODY
Pearson BTEC

For further information about this course, including Entry Requirements, Assessments and Further Study, scan the QR code.

Course Overview

The purpose of Pearson BTEC Higher Nationals in Construction Management for England is to develop students as professional, self-reflecting individuals able to meet the demands of employers in the construction sector and adapt to a constantly changing world. The qualifications aim to widen access to higher education and enhance the career prospects of those who undertake them.

Having for England in the title means this qualification is designed to meet the requirements of specific Occupational Standards. Meeting the requirements of the Occupational Standards relates to:

- Qualifications that are 'quality marked' as Higher Technical Qualifications (HTQ)
- Qualifications that meet the knowledge, skills, and behaviours for identified job roles that are associated with the relevant Occupational Standards

You'll learn through a combination of formal and informal sessions, collaboratively delivered with representatives from the sector, including practical, resource-based learning activities together with work-based learning.

Tutorial back-up relates both to the subject matter and individual mentoring.

You can expect that the tutor to learner ratio tends to be concentrated at 1:12. This allows the individual needs of the HE student to be met.

What You Will Study

The Higher National Certificate (HNC) is a Level 4 qualification made up of 120 credits. The total guided learning hours for Higher National Certificate (HNC) = 480 hours.

Activity to support guided learning will be 90% classroom-based learning supervised by a tutor with 10% live e-learning supervised by a tutor.

The content of the programme is specified by Pearson with four units delivered in each of the years 1 and 2:

- Construction Environment/Digital Applications for Construction Information
- Construction Technology/Legal and Statutory Requirements in construction
- Financial Management & Business Practices in Construction/Construction Design Project
- Building Information Modelling/Tender and Procurement

Attendance Expectations

One day per week in college.

How You Will Be Assessed

Assessment takes place throughout the academic year to assess how you have applied the knowledge. It is anticipated that the breakdown for assessment will be: 10% class exercise; 20% presentation; 70% assignment work.

Entry Requirements

For students who have recently been in education, the entry requirements are to include one of the following:

- A BTEC Level 3 qualification in Construction and The Built Environment
- A level Grade E or above in more than one relevant subject

This needs to be supported by GCSEs at Grade 9-4 (or equivalent) in English and Maths.

Other entry qualifications that will be considered are:

- Other related Level 3 qualifications
- An Access to Higher Education Diploma awarded by an approved further education institution
- Related work experience
- An international equivalent of the above

Fee Information

£3810 (per year)
