

Level 2 Engineering Operative (Mechanical/Fabrication and Welding/Electrical) Apprenticeship

Course Overview

The role covers a wide range of common and job specific skills sets that can be transferred across the manufacturing engineering industry sectors during the course of their careers. Dependent on the sector that they are employed in there may be subtle differences in terms of composition and application of the job role specific skills and knowledge they will require, however the core skills and knowledge will be the same regardless of the sector/area they work in.

Occupational roles for this standard are split into the following areas:

- Maintenance
- Mechanical Manufacturing Engineering
- Electrical and Electronic Engineering
- Fabrication/Weld

The course is delivered by a mixture of theory and practical work, both at College and in the workplace.

What You Will Study

On this programme you will study towards one of the available pathways.

Depending on your job role, you will study a variety of units in Level 2 Diploma/Certificate in practical skills and off the job technical certificate

The apprentice will have a depth and breadth of English and Maths that allows them to operate successfully within their role. This may be met through entry criteria determined by the employer or qualifications and training within the apprenticeship. However, on completion all apprentices will have minimum Level 1 qualifications in English and Maths.

How You Will Be Assessed

There will be continuous assessment of both your practical skills and theoretical knowledge.

START DATE

September

LEVEL

Level 2

STUDY MODE

Full-time

DURATION

18-24 months

AWARDING BODY

City & Guilds

LOCATION

Workplace Based

Entry Requirements

Candidates must have an employer willing to support the requirements of the apprenticeship standard.

Individual employers will set the selection criteria for their apprentices.

Most candidates will have a minimum of Entry 3 in English and Maths.

If you do not have these, we can assess your current level of English/Maths. Only apprentices who began their apprenticeship training when aged 16-18 will continue to be subject to the mandatory requirement to study towards and achieve English and Maths. Apprentices who began their apprenticeship training when aged 19+ will no longer be subject to the mandatory requirement to study towards and achieve English and Maths. However, for apprentices aged 19+, the apprentice or their employer can still choose for the apprentice to study towards an English and Maths qualification. We will continue to fund those apprentices that wish to study towards an English and Maths qualification.

Fee Information

Please contact the Apprenticeship Recruitment Team on 01924 789469 or email apprenticeships@heartofyorkshire.ac.uk

Further Study

This standard aligns to the core engineering skills required for similar occupations in other industries and possible progression onto the Level 3 Engineering Technician Standard.
