

Level 3 Installation Electrician / Maintenance Electrician Apprenticeship

Course Overview

This four-year programme develops the knowledge, skills and competency required for an Installation and Maintenance Electrician in the Electro-technical sector.

For apprentices who have recently achieved an appropriate Level 2 Electrical Installation qualification, they receive accreditation for prior learning and will start the apprenticeship in year 2 effectively and the duration is reduced to 3 years. For apprentices who have recently achieved an appropriate Level 2 and Level 3 Electrical Installation qualification, they will receive accreditation for prior learning and join the programme in year 3, attending college for the 18th edition element only. The duration of the programme is reduced to 2 years in the work place.

What You Will Study

Throughout the programme of study learners will cover a number of specialist subject areas. Some of these are the following:

- Health and Safety Legislation
- Environmental Legislation
- Practices and Procedures
- Scientific Principles
- Inspection and Testing
- Fault Finding and Diagnosis
- Design and Installation.

Maths and English are key elements of apprenticeship programmes and if you do not already have a GCSE at Grade 9-4 in these subjects, you will be required to study Functional Skills at the appropriate levels.

Skills in Maths and English will support your apprenticeship programme, assisting you with assignment writing, research, job applications, presentations, managing your own finances and interpretation of data, to mention just a few. They will also help you in the future. Most employers are looking for ability in these areas and the majority of university courses require you to have Maths and English GCSEs at Grade 9-4. This is why the development of Maths and English is so important, whatever your field of study.

START DATE

September/October

LEVEL

Level 3

STUDY MODE

Full-time

DURATION

4 years.

AWARDING BODY

City & Guilds

LOCATION

Workplace Based
